Content of FDP

The sessions will start with the introduction to MOODLE and then focus on designing/implementing the Moodle LMS platform with hands-on experience.

Following topics will be covered:

- Creating an independent Moodle site using free version/trial version at cloud.
- Guests/students access to your Moodle site without a login password.
- Creating a course using the site administrator's login. Upload at least 5 users/students and enroll them in your course using the site administrator's login.
- Creating a teacher profile, and assign her/him this course Using the site administrator's login.
- Uploading 2 or 3 topic-wise demo lectures on the course using the teacher's login. (optional)
- Creating Question bank in Moodle and creating Quiz in Moodle.
- Allow guests to access your course material without login.
- Assignment submission procedure in Moodle.
- The digitalization of Education Content Through free Tools like OBS, Video Recording with PowerPoint, open shot, etc.

Participants are expected to have a Laptop/Desktop Computer with a good internet connection and working mobile phone connection.
